

22.05.2019 Berlin

Hi,

At the Age of 30, I am a trained carpenter, an experienced B.A. Interaction Designer, lead my self-initiated start-up T-T-T (Table - Tennis - Trainer) till the end of June 2019 and in general very happy with my live.

The last year was a challenging journey where I have continued developing my B. A. thesis in a small team. I have pitched T-T-T at a variety of tech-conferences such as "mobile world congress" inc China or "Laval Virtual" in France. It has been an exciting and demanding time in which i have independently enhanced my design expertise in chosen fields. Besides that the experience thought me many lessons about life, leadership and support in the team. After three years T-T-T I am ready to join new ventures.

I enjoy working diligently by myself as much as to collaborate with in a team, working together for the bigger vision towards tip top results. As a designer I work mostly visually in scribbles, graphics, motions graphics in 2D, in 3D, AR, VR, real-world installations and interactive prototypes.

My goal is to stay curious, keep learning, supporting an inspiring team and having fun at a meaningful job.

#### SKILLS

- AI | Ps | AE
- Sketch
- Flinto
- Win | Mac os
- Cinema 4D
- X Particles
- Redshift
- Houdini
- Unity
- vvvv
- Construction
- Crafting

#### KNOWLEDGE

- Design thinking
